It tells the story of four young people coming of age in the English countryside. There is also a novel, Gold, Gold, Gold, which was written in the same time and place, as well as three tales which take place in other countries. Plot summary The plot is fairly simple. The tale follows the lives of four children, mostly in their early teens. They have different upbringings, personalities and backgrounds, but they all are involved with the English supernatural on a regular basis. There is the Witch, who is the ringleader of the group; Penny, a brash and sassy girl, usually saved from her own actions by her exuberant and protective nature; Ada, a quiet and sensitive child, who is the only girl in the book; and Nancy, the youngest of the four, a mischievous and impulsive girl. Their first adventure starts when Penny and Ada discover a body in the woods of a park that they are visiting. The girls' parents are horrified to find out that the body is that of a young woman and soon they realise that the body is the Witch's. Penny takes it upon herself to find the Witch responsible. She leads the girls on a treasure hunt to find the culprit but they are discovered before they find the answer. This f678ea9f9e
